I would expect the FM/AM members of NAB to complain about XM and Sirrius. XM is knocking a big hole in their revenue base and for good reason XM is providing a service to people that the FM/AM broadcasters never worried about before, those of us out here in rural America. XM provides programming and music we've never been able to get before and FM/AM broadcasters didn't care. And whats more important with XM I don't have to listen to some doughheaded morning show with music I don't like from a city I'll never see, or listen to some silly ass commercials interrupting my favorite tunes while I cultivate my fields in my tractor or feed my cows from my pickup. I can get Headline news or 60s music or 70s music or 50s music or if my wife is with me she can listen to the country stuff. But I don't have to listen to the crap that happens to bounce in from Denver or Albuquerque or Salt Lake City or Oklahoma City, if the weather is right. Please reject NAB's petition 04-160 after all I pay for what I like and I like XM
